IndividuALLYtics® Chief Science Officer Named Co-Editor in Chief for Medical Journal

Ann Arbor, Mich., (date) IndividuALLYtics Inc., Dr. Steven Schwartz, Ph.D., Chief Science Officer, head of clinical delivery design has been named co-editor in chief for the peer reviewed, open source journal, [Clinical Trials and Practice](#). Dr. Schwartz will work alongside [Li Ming Wen, M.D., MMed, Ph.D.](#), [link] the existing editor in chief.

"This is truly an honor for me to give back to the clinical science community, while continuing to guide innovation in health care," said Dr. Schwartz.

Clinical Trials and Practice is an open peer, review journal designed to answer all open-ended questions about clinical trials from the inception of a particular research study to final product or treatment rollouts. The journal has published a wide array of articles including randomized research, review, and case-based reports.

Individuallytics blends the unique N-of-1, group, and behavioral data with computer science experts to make a difference in people's lives with chronic health challenges and comorbidities.

IndividuALLYtics uses *IAQplus™*, the industry's first telemedicine platform that combines data from remote monitoring devices with the best clinical guidelines and, using a patent-pending (small data) analytical engine, optimizes multi-therapy care for Multiple Chronic Condition (MCC) patients including those with (COVID-19).
