Social Work, Exercise, Nurse, Nutrition,
Pharmacist, Behavior Health Specialists &
Preventive Medicine MD

- Better Care Team

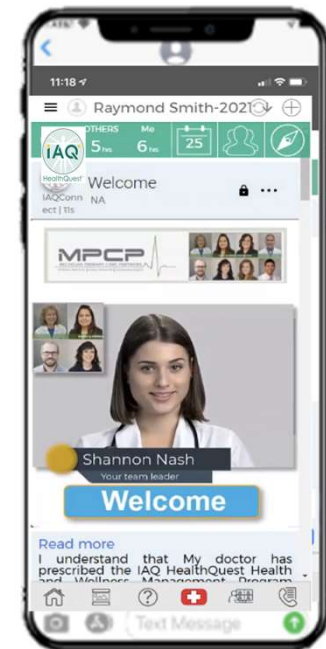

IAQplus Health Device Kit

- Blood Pressure/Heart Rate
- Hub
- Scale (Weight/BMI)
- FitBit (Steps, Sleep, Activities)
- Mental, Social & Life Health Digital Health Diary

- Better Data/Analytics

IAQplus Interactive Digital Health Education And Virtual Care App

- Better Engagement

IAQ+ Slows Co-Morbidity Avalanche

The cascade of aging, high lipids, high blood pressure, obesity, mental stress, and physical inactivity = early morbidity and mortality.

- Each chronic condition and health risk, combined with poor access to high precision personalized quality care accelerates all co-morbid conditions.
- Each chronic condition increases the probability for a major health event, including preventable deaths, each year, per patient with multiple chronic conditions.
- Slowing the progression of chronic conditions reduces major health events.
- A longer, healthier life and drives down utilization costs, increases patient satisfaction.
- Only **IAQ+** provides early, predictive accurate visibility to multiple chronic condition treatment response for each patient with MCC
- **Time for IAQ+ IndividuALLytics Care Management Has Arrived:**
 - **Patients with MCC Get Better Faster with Improved Quality of Life**
 - **Practices Achieve Higher Income With Less Physician Time**
 - **Payers Experience Lower Utilization Cost and Physicians Have Happier Patients.**
